

- **Issue zero – We're back:**

¡We're back! But, ¿where do we come from? Sailing Madrid was born back in 2015, 7 years ago, with the purpose of being the first Spanish team competing in Hydrocontest.

Those who just met us should be wondering what exactly IS the Hydrocontest. It's a competition in which the participants go through different trials, like Heavyweight, which simulates cargo Ships; Lightweight, which simulates leisure boats, like motorboats or yachts; or Long Distance, which, as its name states, is an endurance race.

And thus, in 2016, we participated for the first time. To do so, we modelled and built TWO boats in a very short time and with little budget. We're pretty proud of that!

Our purpose as an association is that any future engineer can learn about design and teamwork, all while they're having fun and racing.

This said, ¿don't you want to get to know us better?
¡Stay tuned for new uploads!
